

at Last.

MILLY H. MOORE.

across a vast desert, nearly as
and to the westward, where
river, reaching its wayward
my brethren sack with water!"

unappealing eye,
led to the unlikely sky,
and some of its burdened breast,
like mouse beneath my feet;

no ash of grief shall rise,
mirage before me flies,
weak, fond dreams, wherein
I love, what might have been;

all spring to meet each day
as sweet as first love's kiss,
all spring to meet each day
as sweet as first love's kiss—
at the last, my own!—

ears, I may but come
in some sweet Syrian home,
as sweet as first love's kiss,
my before I die!

—Appleton's Journal.

The Washington Treaty.
Both Houses of the New Brunswick Legislature have adopted, by a unanimous vote, the resolutions condemning the terms of the Treaty of Washington, and the fact that the Legislature, at the passage of the resolutions the Legislature was prorogued, with the result that the Legislature is unable to meet formally. The following is a paragraph in the Lieutenant-Governor's speech relating to the Treaty:

You Haven't Tried Them.
Victim of debility, who is responsible for your feet's pain? Not yourself, you will say, for you've done all you could to cure it. That's a mistake on your part. You haven't tried them. You haven't tried the **Golden Rule** (Golden Rule) dyspeptic, with an uneasy stomach and a weary face, of course you don't think you're responsible for your own ailments. But you are. It's easy to see from your condition that you haven't tried the **Golden Rule** dyspeptic.

Illness sufferer, it is not your fault, you think.

The result of the deliberations of the High Joint Commission at Washington, so far as our Dominion is concerned, are, unfortunately, calculated to excite alarm and dissatisfaction; but we cannot for a moment suppose that the Dominion Parliament will give its consent to that portion of the Treaty which spouses of our invaluable fishery rights

Your symptoms grow worse day by day. Blue pill does you no good. Very likely, but you can be brought round for all that.

Why haven't you tried Hostetter's Bitters?

Friend, on whom fever and ague alternately blows and cold, and whose brain seems to be burning with effects of some powerful drug, do you assume the right course? No! You must have Hostetter's Bitters. It will cure you.

What more can I say? Why don't you try it now?

When we should have received in return
merchandise, at least, a free admission into
the United States markets of our ships,
coal, and lumber.

GENTLY DOES IT, without pain or irritation
DR. WALKER'S VINEGAR BITTERS

...the time thoroughly tining their mechanical action, that it seems as if they were not recognized as an improved man. Yet, the result is solely due to nature, reinforced, and sustained by the most vegetable alterative and tonic, that ever passed the lips of the sick and suffering.

THE DRY GOODS MOVEMENT.—The following shows the imports of foreign goods into New York during the past year, and since the beginning of the year 1861:

<i>For the Week.</i>	1870.	1871.	To sell a new invention, 20 per cent. profit. Send 10 for sample. WOOD MASTERS CO., Malden, Mass.
ntered at port	\$1,581,174	\$2,059,808	
rown on market	1,918,224	2,045,969	
<i>Since Jan. 1.</i>			
ntered at port	\$42,406,397	\$56,038,028

 I have taken your name to our list.
 Address, BRIGHT SIDE CO., Chicago.

0000 - 10 D A

ing off safe, and they are good horses than any other stock in the Union. This we tell them, is owing to two principal reasons; in the first place, we breed from the very best stock; and in the second place, our condition use SHEPARD'S CAVALRY CONDITION POWDERS, which in our judgment are the most reliable advantage.

A Boston woman advertises for a husband, and says, among her other qualifications, "I can make a good horse."

The purest and sweetest Cod-Liver oil in the world is HAZARD & CASWELL's made on the sea-shore, from fresh, selected livers, by CASWELL, HAZARD & CO., New York. It is absolutely pure. Put in it what you have once tasted. Prefer it to all others. Physicians have decided it superior to any of

Johnson's Anodyne Liniment will give more relief in cases of Chronic Rheumatism, no matter how severe, than any other article known to medical men.

Consumption
ITS CURE AND ITS PREVENTION
By J. H. SCHENCK,
M.D.

Many a human being has passed away, there was no other reason than the one and indaptably proved means of cure, dear to family and friends are sleeping slumber into which, had they calmly adopted

DR. JOSEPH H. SCHENCK
TREATMENT.

and availed themselves of his wonderful medicines, they would not have fallen.

Dr. Schenck has in his own case proved sufficient vitality remains, that vitality and his directions for their use, is healthful vigor.

In this statement there is nothing To the faith of the invalid is made no that is not a thousand times as satisfying as visible works. The theory of the cure by medicines is as simple as it is unfeeling. requires no argument. It is self-assured.

The Seaweed Tonic and Mandrake Pills are weapons with which the citadel of the malady is stormed. Two-thirds of the cases of consumption of perils and a functionally disordered liver condition the blood and intestines - sympathetic stomach. They respond to the moribund liver. Here then comes the culminating setting in, with all its distressing symptoms.

CONSUMPTION.

The Mandrake Pills are composed of the noblest gifts - the Pedophallum lottatum. The blood-searching, alterative properties - unlike calomel, they

The work of cure is now beginning. The mucous deposits in the bowels and in the nasal are ejected. The fever subsides, the arteries clear from their obstructions, and from its torpidity. The stomach becomes active, and the patient begins to feel that he is getting well.

A SUPPLY OF GOOD EATS

The Seaweed Tonic, in conjunction with meates and assimilates with the food. It now progressing, without its previous tortures become painless, and the cure is seen. There is no more nausea, no exasperating mach. An appetite sets in.

Now comes the greatest Blood Purifier

The second thing is, the patients must be in good room, until they get well; it is almost impossible taking cold when the patient is in a room that cannot be prevented or a cure cannot be effected.

riding out, especially in this section of the fall and winter season, are all wrong. I recommend that the least healthy patients be badly diseased; and yet, because they are they must not sit down quiet: they must work as much as and as fast as the strength will permit. The least healthy patients in good spirits be determined to get over great deal to do with the appetite, and is the pain.

To despair of cure after such evidence of the worst cases, and moral certainty of a sinful. Dr. Schenck's personal statement of his own cure as in these modest words: "Many years ago I was in the last stage of consumption, and was told by the doctors that I was to die."

"I was weighed shortly after my recovery. Doctor, . . . then looking like a mere skeleton, I was only ninety-seven pounds; my presence was hardly noticed. . . ."

The directions for taking the medicines of the Intelligence even of a child. Follow the kind and Nature of the patient, excepting cases the Mandrake Pills are to be taken doses; the three medicines need no other cautions.

Dr. Schenck's medicines are constantly thousands of families. As a laxative or Mandraka Pills are a well-prepared Pulmonic Syrup is a cure of coughs and regarded as a prophylactic against constipation of its form.

Price of the Pulmonic Syrup and Seaweed
a bottle, or 87¢ a half dozen, Mandraka Pills, 50¢ a bottle, 4.50 a half dozen.

Box. For sale by all druggists and dealers.

GEO. C. GOODWIN & CO., Ags.

7-30 Gold L

OF THE

Northern Pacific Rai

RAPID PROGRESS OF THE

The building of the Northern Pacific Railroad (July last), is being pushed forward with from both extremities of the line. Seven men are employed in Minnesota, and the grade is nearly completed 260 miles from Lake Superior; trains are running over of finished road, and track-laying is rapidly toward the eastern border of Dakota. The purchase of the St. Paul & Pacific Road, the Pacific Company now has 113 miles of completed road, and by September next this will be increased to 260.

A GOOD INVESTMENT. JAY ARE now selling, and unhesitatingly recommending, the most Profitable and perfectly safe investment, the **Grange Land Grant Gold Bonds of the Northern Railroad Company**. These bonds are payable in Seven and Three-Tenths per cent. gold in less than 8 per cent. currency) and are secured by only mortgage on the ENTIRE ROAD AND TERMINALS, and also, as fast as the Road is completed, on **23,000 ACRES OF LAND** to be taken, or 500 Acres for each \$1,000 Bonds exempt from U. S. and State Taxes, and Interest in Gold; Denominations: Coupons, \$1 Registered, \$100 to \$1,000.

LANDS FOR BONDS. North 7-30's are at all times receivable at TEN ABOVE PAR, in exchange for the Company their lowest cash price. This renders them THE BEST INVESTMENT AND THE SAFEST.

SINKING FUND. The proceeds of LANDS are required to be devoted to the re-cancellation of the First Mortgage Bonds of the Company. The Land Grant of the Road exceeds 100 Acres. This immense Sinking Fund will easily cancel the principal of the Company's bonds. Therefore it falls far below the true accurate rate of interest, there is no investment, each people, which is more PROFITABLE OR SAFE

EXCHANGING U. S. FIVE-TWENTIES.—The success of the New Government 5 per cent compels the early surrender of United States. Many holders of Five-Twenties are now exchanging for Northern Pacific Seven-Thirties, thus handsome profit, and greatly increasing the same.

OTHER SECURITIES.—All Stocks and Bonds will be received at their rent price in exchange for Northern Pacific. EXPRESS CHARGES on Money or Bonds and on Securities will be paid by the Financial Agents. Full information, maps, etc., can be obtained on application at any

SOUTH BRITAIN TREE
All kinds of Harness work made to
All parts of Work made for the trade

Whimsical, roughly read.

Affectionate, and winning. Outspoken, and a little bit of a rebel. What can come of such a beginning?

Pretty? Well, let me reflect. Roy checks, sure eyes, all that, a flash of teeth, and a smile. On one side, with tiny straw hat.

Deadly rick, as worn. Obscuring only his face. The leaf of straw hat, as though torn in the smile of a feminine eye.

Building type of a strawberry tint. A dimpled and young face. Fascinating, in all but a tiny detail. Of canny, perhaps out of place.

In a portrait, but natural. With her view of a woman and her duty. And her quick decision, what you.

Accomplishments, varied and vast. She has been a model and a duty. And a doll, a tell, and last. But not least, a charming middle.

She has kindly agreed to be mine. Singing for me, and certainly cry. With the wisdom of age, and a fine sense of what a man pays for a "rich."

I am glad to profess her a doll. And a horse, and a woman, and I do I may take some my life, with all of her very remarkable traits.

Farm, garden and household. Cleanse and ventilate your cellars. Most cellars contain a large amount of decomposing vegetable matter in the form of decaying fruits and vegetables, which give off their foul and poisonous gases during the process of decay. Then again they are usually damp, close, unventilated and unclean.

Air which is kept in the cellars, and the purifying influence of sunlight soon becomes impure and unfit to breathe, and if to this we add the dampness and the constantly close atmosphere, the result is a most unhealthy condition of the atmosphere of cellars. This atmosphere is constantly finding its way into the dwelling above, often causing lung fever, and always impairing the health of its occupants.

THE NEED AND PROFIT OF IRRIGATION. Nowhere has human soil been more forcibly demonstrated than in the arid farmer's bygone dealings with water. This mobile, subtle fluid, which will voluntarily travel wherever you will, if you give it an inch of descent per mile, ought to have long since been absolutely everywhere at the beck and call of every cultivator. And yet, I have stood beside a corn-field parched and withering from drought, while a mill stream danced and bubbled right through its center, falling twenty feet in a hundred rods, yet moistening the roots of plants, and making the soil fertile. Its bed on either side, while three days' work of two men would have dammed and diverted its waters so that four or five acres of the same soil would have been unrolled and set to growing again by their influence. Whoever travels with open eyes may note a thousand such instances, and almost any State—a hundred or more in nearly every country.—Horse Greedy.

THE BEST BREED OF SHEEP.—In answer to the query, which was the most profitable breed, a speaker at the convention, considering the conditions prevalent in our climate, botany and agriculture, no other breed possessed so many of the requisite conditions as the American Merino. It is peculiarly adapted to occupy a very wide range of the desired points in any breed, and coming near to universal adaptability than any other. The Saxons, with their long, fine fibre, and even the Shetland and the French a larger frame and greater length of wool, but for compactness of form, sound constitution, and the great quantity of wool suited to a variety of uses, our improved Merino is unsurpassable. In some parts, where meats are high, the English and Scotch are profitable and popular. The Cotswold appears to be preferred by some for their nation-producing qualities. The South-downs are preferred by three-fourths of the breeders for their early maturity of lambs. The Leicester are too highly bred. The Lincoln, as modified by the breeding of last year, is a magnificent animal, producing a lustrous comb of great length. It is greatly to be desired that the efforts of honest and reliable breeders of really fine animals should receive encouragement. Dodge, of the Department of Agriculture.

ORCHARD AND NURSERY.—Trees set this spring will need constant care in rubbing off buds that start from the trunk, and are not wanted. In the case of fruit trees be sure to rub off buds that start from the trunk, and are not wanted. In the case of fruit trees be sure to rub off buds that start from the trunk, and are not wanted.

Cuttings.—All young orchards do better if the ground is kept cultivated, and if any fine crop is raised between the rows, supply the soil with manure.

Seeds.—Look out for insects of all kinds. When the tree cuttings appear, destroy their nests.

Cuttings.—The remedy for the curculio is to place a sheet under the trees and shake the insects into it, when they can be collected and destroyed.

Shrub upon which the curculio can be killed by dipping the leaves with lime, ashes or dry garden.

KITCHEN GARDEN.—Weeds will require the constant use of the hoe and rake, and if attended to with regularity, less time to destroy them than when they are allowed. Where the rows are wide enough to admit the cultivator, the hoe can be used with great advantage.

Seeds.—Many seeds require to be sown this month for a succession, as well as for late planting.

Appropriately be sown until green peas are ready for table; set cutting and sowing in a dressing of manure between the rows.

Beans.—Both varieties may still be planted for late crops, and the late planted in the hot bed may be set out. Put poles to all running varieties.

Food for Gunpowder.

The scenes in Paris were terrible a few weeks ago, when the Communists were fighting the more aristocratic and fashionable streets to get men to force into their ranks. A correspondent of a London paper, who was seized by a party of Communist soldiers, described one of these hunts:

I produced my passport, which, most luckily, I had not left at home. It was evidently foreign, and that sufficed to show that I was not liable to be pressed for service. In the intervals between the examinations of my identity I looked out at the process of man hunting.

Eight men with bayonets surrounded a front door; two of them went in with their bayonets of course; the other six flanked up the door and allowed no passage in or out. The two who penetrated into the interior went to the porter's lodge, roughly shook the door open, and with a brutal yell exclaimed, "Who is hiding there?" The person hiding was an old woman, who was frying potatoes in a black hole, very low and are dull and heavy, with more sellers than buyers.

WHILE a man in Cincinnati was cleaning a boiler, another man stepped into it from an adjoining, scalding the man to death.

JUDITH ISABELLA, of Troy, has appointed a commission to inquire into the mental capacity of Asa Kittle, the blind boy murderer.

The Boy and the Brook.

(Largest new poem.)

Down from yonder mountain height
The brooklet flows through the village street;
A boy comes forth to wash his hands,
Washing, yes, washing, then he stands,
In the brooklet now and then,
And meets in the summer heat.

"Brook, what mountain dost thou come from?
O my brooklet cool and sweet!
I come from yonder mountain high and cold,
Where I have been now and then,
And meet in the summer heat."

"Brook, to what river dost thou go?
O my brooklet cool and sweet!
I go to the river that flows in the vale,
Where I have been now and then,
And meet in the summer heat."

"Brook, to what garden dost thou go?
O my brooklet cool and sweet!
I go to the garden in the vale,
Where I have been now and then,
And meet in the summer heat."

"Brook, to what fountain dost thou go?
O my brooklet cool and sweet!
I go to the fountain in the vale,
Where I have been now and then,
And meet in the summer heat."

Farm, Garden and Household.

REMOVING IRON-MOULD FROM FABRICS.
In the *Chemical News* advice, best method for removing stains of iron-mould from fabrics, that the mark be first wet with yellow sulphide of ammonia, by which it will be immediately blackened. After allowing it a minute or two to penetrate, that excess of sulphide is to be washed out, and the black spot treated with cold diluted chlorhydric acid, by which the iron is once removed. Finally, wash well with water. This method is said to avoid the serious objection of weakening and rotting the fibres.

A NEW REMEDY FOR INTERMITTENT FEVER.—German physicians, as appears from medical journals, have found a tincture of the leaves of the *Eucalyptus globulus*, or Australian gum-tree, to be a remedy for intermittent fever. Dr. Lortimer gave it to fifty-three patients, of whom forty-three are completely cured. In five others there was a relapse, owing to a failure to keep up the supply of the tincture. In eleven of the cases, the fever had been without effect, and nine of these were cured by the *Eucalyptus*. This tree, of considerable size grows in Australia. Its wood is used in ship-building.

INSERTION OF SCREWS IN WOOD.—When screws are driven into softwood, they are very likely to work loose, and it is often difficult to make them hold. In such cases it is said that the use of glue is of service. A stick of about half the diameter of the screw, and of the same length, is to be first immersed in a thick glue, and then inserted in the hole prepared for the screw, which is then to be driven home as quickly as possible. The glue, which is to be used, is to be made by mixing equal parts of glue and turpentine. The glue is to be used in the hole prepared for the screw, which is then to be driven home as quickly as possible. The glue, which is to be used, is to be made by mixing equal parts of glue and turpentine. The glue is to be used in the hole prepared for the screw, which is then to be driven home as quickly as possible.

HOW GOOD FARMERS SAVE THEIR MONEY.—They take good papers and read them. They keep their farms in good order. They do not leave their farms to the weeds, and do not suffer from the three-fold expenditure of time and money. They use their money judiciously, and do not waste it on the purchase of all kinds of trumpery sales. They are careful of their cattle, and do not let them run wild. They are careful of their crops, and do not let them be eaten by the weeds. They are careful of their money, and do not let it be wasted on the purchase of all kinds of trumpery sales. They are careful of their cattle, and do not let them run wild. They are careful of their crops, and do not let them be eaten by the weeds. They are careful of their money, and do not let it be wasted on the purchase of all kinds of trumpery sales.

Immigration Statistics.
It appears from the report of the Bureau of statistics that the number of aliens added to our population since the formation of the Government is 7,800,000 and of these about 6,000,000 were living in the country on the 1st of Jan. 1870. During the year ending Dec. 31, 1870, the number of immigrants was 378,796, against 369,922 in 1869. The increase is accounted for by the Franco-German war, the immigration from Germany has for some time exceeded that from Ireland. During the last ten years, for instance, the average annual number of immigrants has been 378,796, against 369,922 in 1869. The increase is accounted for by the Franco-German war, the immigration from Germany has for some time exceeded that from Ireland. During the last ten years, for instance, the average annual number of immigrants has been 378,796, against 369,922 in 1869.

EASTERN WISDOM.—Some of the magistrates of the East seem to be gifted with a wisdom of the wisdom which Solomon such a wide and lasting reputation. At Ghazepore, in India, recently, one of these judges was confronted by two women who claimed the same woman for wife. The woman, it seems, had no voice in the matter, and from the conflicting testimony of the women it was impossible to get any facts in the case. The magistrate proposed, by way of a fair settlement, that the man should take the disputed wife by turns, a fortnight to each, and turn about. One agreed to this very readily, but the other demurred, and refused warmly against the judgment, whereupon the magistrate immediately handed the woman over to the latter, and his "lawful wedded wife." Every one will discover a sort of natural equity in the decision, but the decision, which would have been committed to the contempt of Court.

Montgomery, Ala., boasts of a mile used to draw a horse-cart. It asserts that, no matter where the mile is taken, the horse will be found in the same route, under a full gallop, and the horse, places himself in position for harness, and as soon as he is hitched up speeds away to the fire with all his might.

It is expected at the Treasury Department that the amount of tax due from the New York Central Railroad will be paid without unnecessary delay.

News Summary.

There is a sixteen-year-old boy in Lehigh, Penn., who weighs 250 pounds. The British Government has given its consent to the union of British Columbia with Canada.
